

Unfolding Shakespeare's Hamlet 2017

23rd-29th July 2017

Hamlet Academy and the Swedish Shakespeare Society invite you to join us digging into new layers of Shakespeare's most enigmatic drama, Hamlet.

7 days in July on the very spot - in the historic building The Lieutenant School with a spectacular view to Hamlet's Castle.

We invite YOU TO BEcome an active partner in unfolding Hamlet in quite a new way, using a variety of up-to-date learning methods.

For 7 days from 10 AM to 5 PM you will experience a series of breathtaking lectures, talks, workshops, excursions and a tailor made guided tour to Hamlet's own castle. When looking at Shakespeare's text through the lenses of the Renaissance, one may ask: Why is the atmosphere in the drama so gloomy? Why must everyone die in the end? Why is Shakespeare hiding coded scientific messages in Saxo's old story about the Danish prince? Why is Shakespeare inclined to use codes at all?

And what may Shakespeare's drama, about a seemingly confused young man, tell modern people of the 21st century?

We will dig into these issues guided by the latest international researches and by the perspectives of the participants' own life experiences. We will map the Hamlet Drama which with codes unfolded is going to reveal a compelling new interpretation of how the globe is connected with the Universe. All of this based on rediscovering and reading texts of ancient Roman Greek science, in addition with an old wisdom tradition dating back to the King Solomon Temple in Jerusalem. Looking forward to unfolding Hamlet with you.

Best regards

Roland Heiel & Lisbeth Joergsholm

Experienced local trainers

Roland Heiel, founder of the Swedish Shakespeare Society, is an experienced lecturer & teacher of Shakespeare's works.

Founder of HamletAcademy, **Lisbeth Joergsholm** is a devoted researcher in the Hamlet/Shakespeare Universe. Lisbeth is inspired by the works of the well-known Dane, court astronomer & scientist Tycho Brahe, who was Northern Europe's leading scientific figure running a research center on the island Ven. His patron of the arts was King of Denmark Frederik II residing in Kronborg Castle.
